

100' KING COBRA™ REACH 20' BELOW GRADE

INTRODUCING THE 100' KING COBRA

Parapets are the bane of truck operations. Now your crew can go up, over, and down with our NFPA-compliant eight-foot articulating jib.

THE REACH IS ALL YOURS

MORE EFFICIENT IN TIGHTER SPACES

Firefighters may enter the King Cobra's platform our ground level as close as 10' from the front of the chassis cab.

ROSENBAUER KING COBRA™ AERIALS

OUTRIGGER DEPLOYMENT

WIRELESS RADIO REMOTE

Traditionally, setting up your aerial for operations is slowed down due to the truck operator being positioned at the rear of the apparatus body for outrigger deployment. Rosenbauer's wireless radio remote has individual outrigger controllers to precisely deploy while being up close.

KING COBRA PERFORMANCE

LADDER REACH	100' Vertical Reach	APPARATUS BODY	FX or EXT
PAYLOAD CAPACITY	1000lbs. Dry/500lbs. Wet	WATER TANK	Up to 500 Gallons
WIND RATING	50 mph Unrestricted	FIRE PUMP	Flow Rates up to 1500 gpm
ICE RATING	1/4"	AERIAL CONTROLS	Rosenbauer Smart Controls; Standard Pedestal or ACS
BELOW GRADE OPERATIONS	-12° Without Jib	OUTRIGGER	2 Front/2 Rear 17'6" Jack-Spread

COMMANDER

THE MOST MANEUVERABLE

Rosenbauer offers the most wheelbase options for your aerial. A cramp angle of 45° matches perfectly with one of three sets of steering arms (195", 225" or 250") using the Hendrickson SteerTek NXT.

CORROSION RESISTANCE

HOT DIP GALVANIZING

Corrosion is enemy number one. Rosenbauer's hot dip galvanized aerials offer a 25-year corrosion warranty. Aerial sections, torque box and outriggers are chemically cleaned and then dipped fully coating the interior and exterior.

SMART AERIAL TECHNOLOGY

SAFETY AND EASE

Operating an aerial is no longer a guessing game. Rosenbauer aerials utilize CAN-Bus to continuously monitor the aerial to reduce operator error. Our SMART screens display real-time performance information on the control stand and rear of the body.

SHORT-JACKING

INCREASING YOUR OPTIONS

Rosenbauer's SMART aerials allow aerial operations on the short-jacked side, where some competitors' aerials won't even leave the cradle without full outrigger deployment.
